Federal Register notice. In your response, please reference each question number (1-14).

In addition to providing the information requested in 16 C.F.R. §1115.13(d) (1-14), paragraph 15 of the "Full Report" requests any additional information needed by the staff. **In accordance with paragraph 15 (see page 35,002), please also provide the following additional information:**

15a. Copies of all test reports, analyses, and evaluations, including premarket tests and reports of tests and any analyses related to the reported problem. Include the date and place such tests and analyses were conducted by or on behalf of the firm and the identity of the persons involved in the testing and analyses.

15b. Copies of all engineering drawings, engineering change notices and material specifications relevant to the identified problem.

15c. The identity of the person(s) who identified the potential problem, the date he/she identified the problem, any persons they notified, and the date of notification.

15d. Concerning the information specified by 16 C.F.R. §1115.13(d)(6), please include a copy of all safety related consumer or dealer complaints, warranty claims, reports of injury, and copies of all documents related to such complaints, claims and injuries. Please include, copies of all court complaints and related documents filed in or associated with lawsuits involving the product and a description of the resolution of those lawsuits, if any.

15e. Provide two samples of the product, including retail packaging and instructions for assembly and use. Also provide a sample of the "fix", if such has been made, with instructions to be given to consumers. If there is a cost associated with these samples, notify us prior to sending the samples. If it is easier to send drawings and the two types of HP seat poppets, that will be sufficient.

15f. A copy of the firm's catalog depicting the product.

If the consumer complaints and the other documents requested in Paragraph 15d above are unavailable, please indicate the reason for such unavailability, and provide a summary of the requested items containing the name, address and telephone number of the claimant, or the name address and telephone number of the plaintiff's attorney.

Staff Assessment

After receiving the firm's response, the Commission's Compliance staff will make a preliminary determination as to whether it believes the product presents a substantial product hazard. See 16 C.F.R. § 1115.12(a). Therefore, it is of primary importance that the firm now provide all of the requested information so that the staff can make an accurate assessment of the potential safety hazard associated with the product.

Information Disclosure

The Commission often receives requests for information provided by firms under section 15(b) of the CPSA. Section 6(b)(5) of the CPSA, 15 U.S.C. § 2055(b)(5), prohibits the release of such information unless a remedial action plan has been accepted in writing, a complaint has been issued or a firm consents to such release. (See section 6(b) of the CPSA, as amended (enclosed)).

In addition to the above, if the firm submits any information that it considers to be a trade secret, or confidential commercial or financial information, it must mark it "confidential" in accordance with section 6(a)(3) of the CPSA, as amended, 15 U.S.C. § 2055(a)(3) and 16 C.F.R. § 1015.18. The Commission is prohibited from disclosing to the public information that is in fact trade secret or proprietary commercial or financial data. If the firm does not request confidential treatment at the time of its submission or within ten days thereafter, the staff will assume that it does not consider information in the submission to be a trade secret or otherwise exempt from disclosure under section 6(a) of the CPSA and the Freedom of Information Act, 5 U.S.C. § 552(b)(4).

Continuing Obligation

Please note that the firm has a continuing obligation to supplement or correct its "Full Report" as new or different information becomes known. For instance, if after filing the "Full Report" the firm receives or learns of information concerning other incidents or injuries, or information that affects the scope, prevalence or seriousness of the defect or hazard, it must report that information to this Division immediately.

The Division of Corrective Actions requests that the firm provide a response within 10 working days of your receipt of this letter. **Please reference the CPSC file number in your response.** If you seek assistance or if you have any questions, you may contact James A. DeMarco, Compliance Officer, Division of Corrective Actions, U.S. Consumer Product Safety Commission, 4330 East West Highway, Room 613, Washington, D.C. 20207-0001,

telephone: (301) 504-0608 x 1353. Thank you for your cooperation in reporting under section 15 of the Consumer Product Safety Act.

Sincerely,

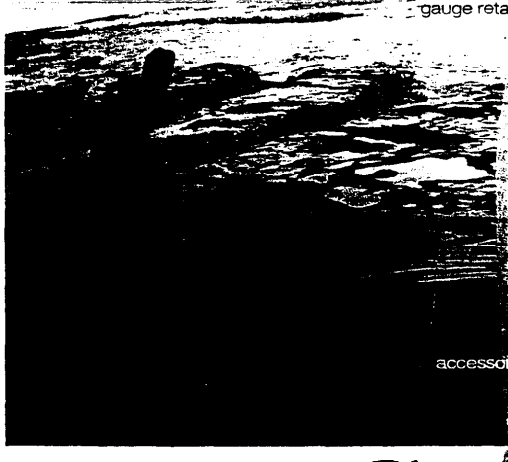
BUOYANCY COMPENSATORS

DIMENSION XP
DIMENSION

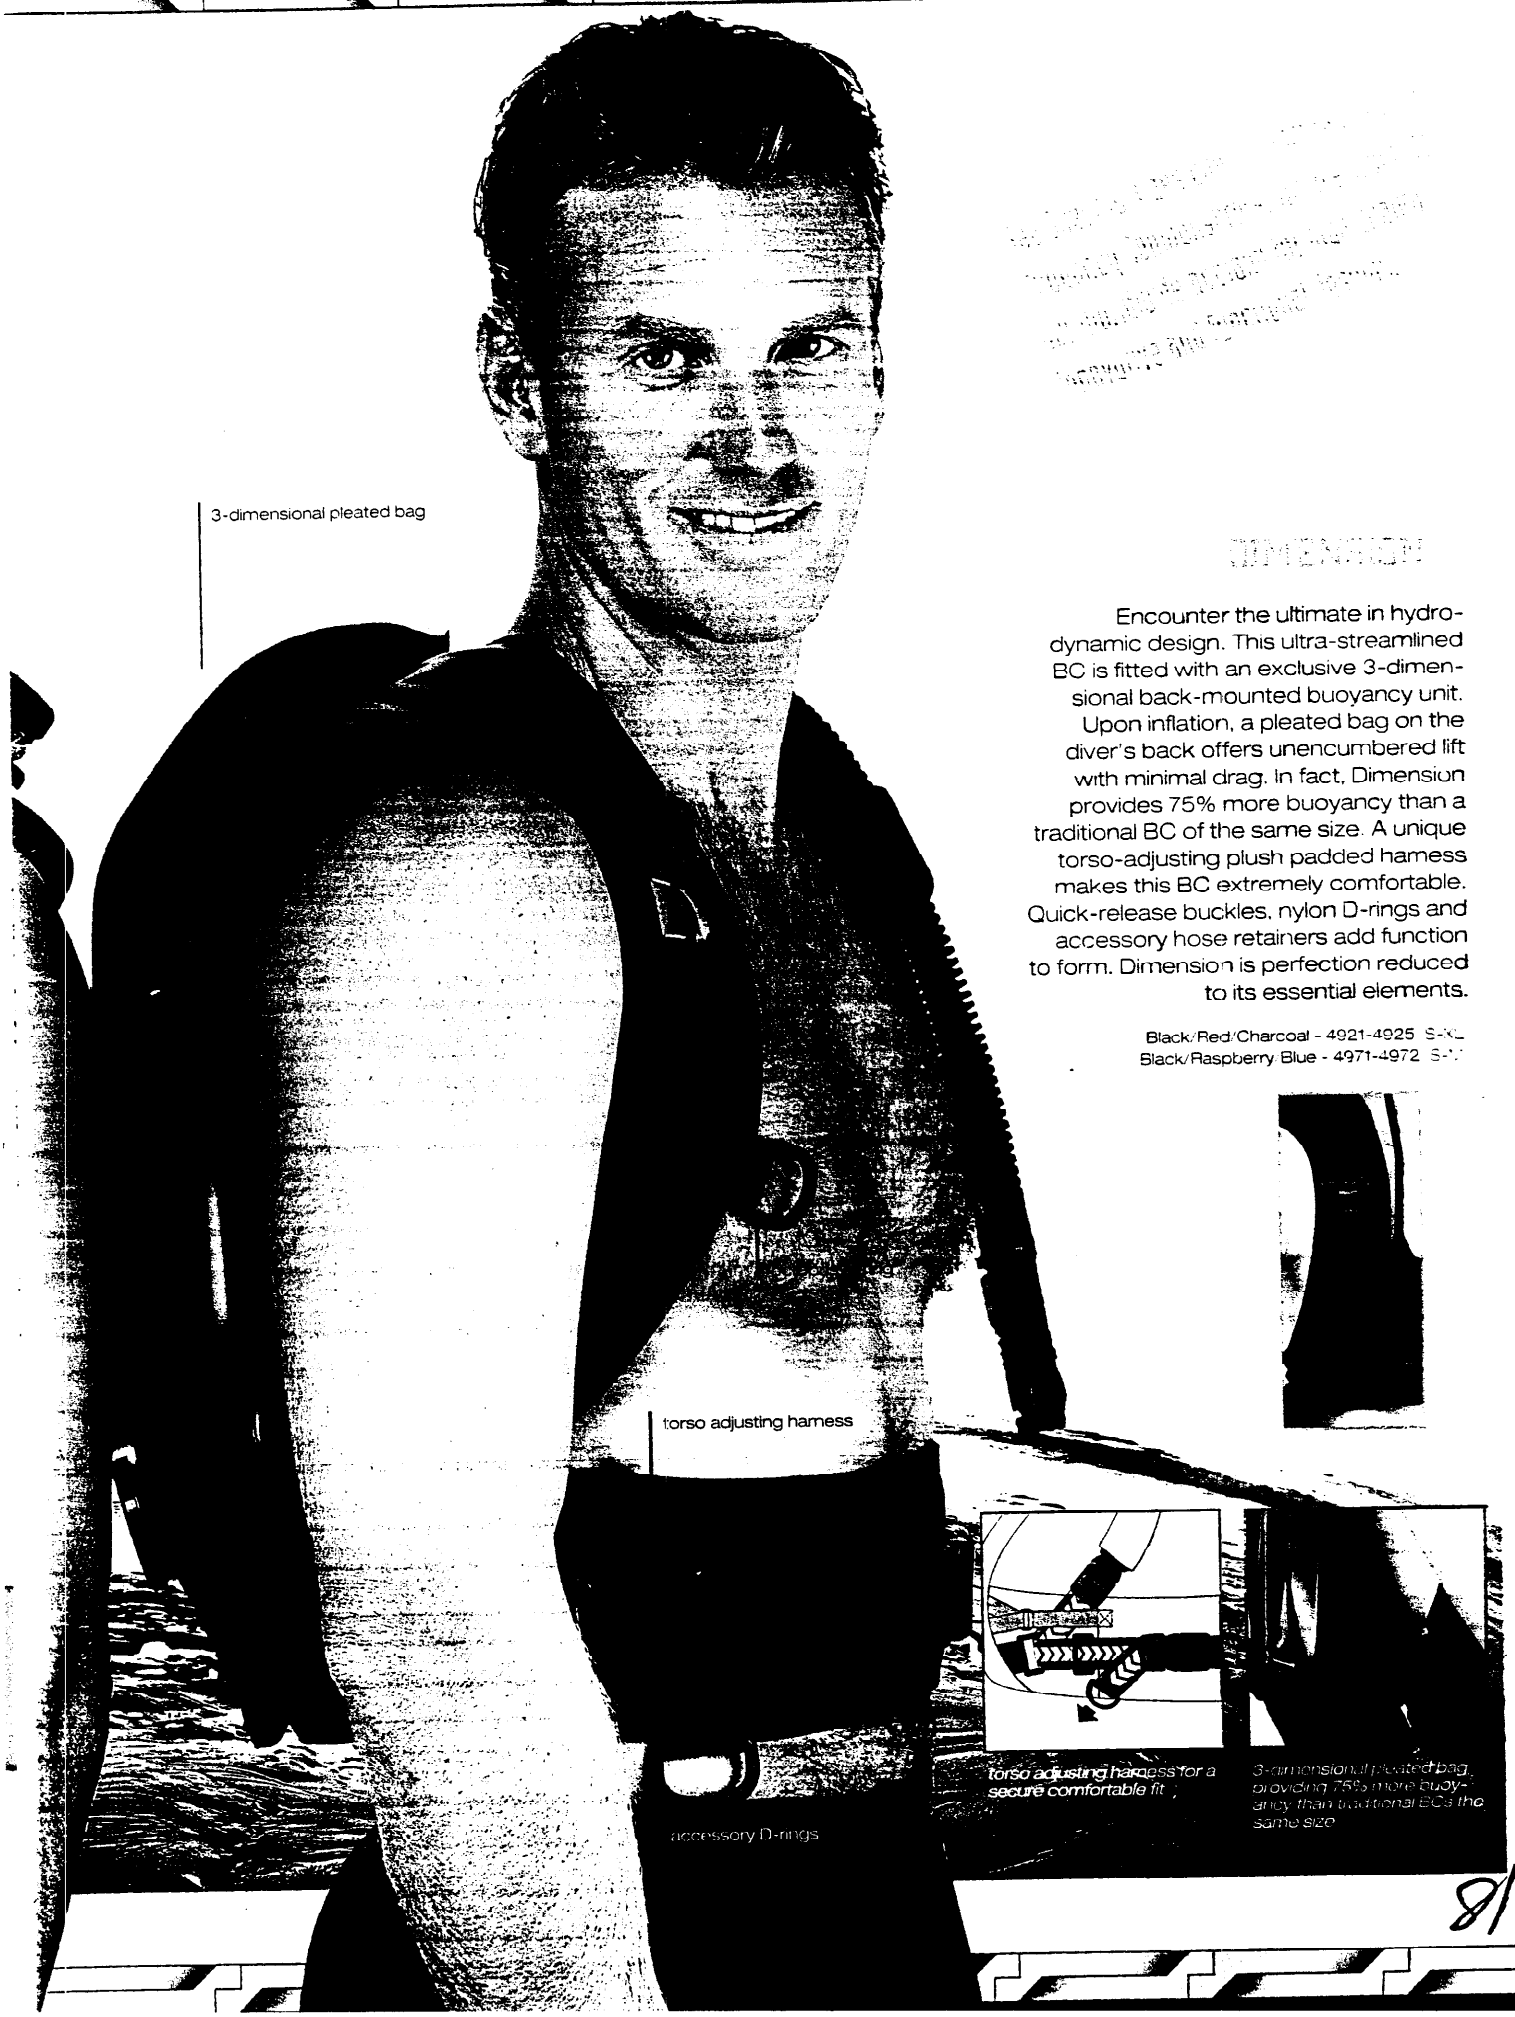
Combine the lowest profile BC on the market with a revolutionary harness design and you get the Dimension XP. The integral body harness incorporates a depth compensating cummerbund with adjustable shoulder straps, plush lining and two pockets for ultimate diving comfort. Together with the incredible low profile features of the 3-dimensional back mounted buoyancy unit, this BC sets new standards in hydrodynamic design.

There's no holding back with the Dimension XP.

Black/Blue/Purple - 4931-4935 S-L
Black/Lime/Blue - 4991-4995 S-L
Black/Raspberry/Blue - 4941-4942 S-L



80



DIMENSION

Encounter the ultimate in hydrodynamic design. This ultra-streamlined BC is fitted with an exclusive 3-dimensional back-mounted buoyancy unit. Upon inflation, a pleated bag on the diver's back offers unencumbered lift with minimal drag. In fact, Dimension provides 75% more buoyancy than a traditional BC of the same size. A unique torso-adjusting plush padded harness makes this BC extremely comfortable. Quick-release buckles, nylon D-rings and accessory hose retainers add function to form. Dimension is perfection reduced to its essential elements.

BUOYANCY COMPENSATORS

PREDATOR / INFINITY 2

PREDATOR

Predator. The BC that's built as tough as it sounds.

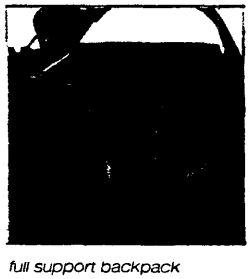
840 Denier Jr. Ballistic Nylon with heavy duty abrasion pads make this unit built to last. The full support pack and Neutrafoam™ padding add stability and comfort. Quick-release adjustable shoulder buckles, stainless steel D-rings and floating chest fastener conform to various sizes.

If you want your BC to go the distance, go with the Predator.

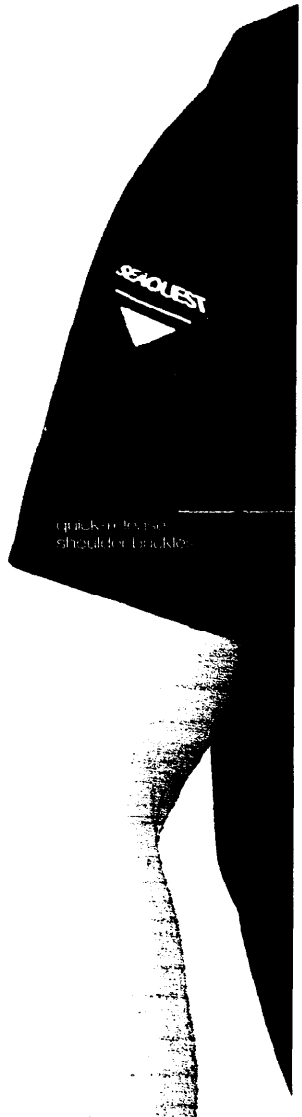
Black/Red/Charcoal - 4912-4915 M-XL

integral shoulder adjustment

for proper fit, all sizes come with an adjustable MULTISET™ waistband



full support backpack



stainless steel D-rings

INFINITY 2

This BC defies the limits of dive technology. The Infinity 2 offers full-size buoyancy in a streamlined, low profile unit.

Floating chest fastener, full support backpack, padded integral body harness with NEUTRAFOAM™ and adjustable quick-release shoulder buckles with thumb levers round out the list of features.

Infinity 2. It's everything you want in a BC. And less.

EXPLORER

No matter where you're going the Explorer will take you there. Specifically designed for the diver who likes to go where no one has gone before, this BC packs lots of features into a remarkably light and compact unit. You'll find adjustable shoulders, compensating MULTISET™ waistband, gauge retainer, D-ring for an alternate second stage, padded integral body harness, low-profile design and more in a very low drag configuration.

The Explorer. Take it with you. Wherever.

Black/Raspberry/Blue - 4040-4042 (XS-M); Black/Lime/Blue - 4021-4025 (S-XL)
Black/Blue/Red - 4031-4035 (S-XL); Black/Blue/Purple - 4081-4085 (S-XL)

EXPLORER PRO

Advanced divers require advanced equipment. Hence the Explorer Pro. A lightweight, reduced buoyancy BC with the lowest drag fit available. The plush, neutrally buoyant padding keeps the Pro comfortable even without a wetsuit.

And the lower pack design transfers weight from your shoulders to your hips. There are console and low pressure hose retainers, a separate octopus D-ring, fixed D-rings for accessories.

The Exolorer Pro. For experienced divers.

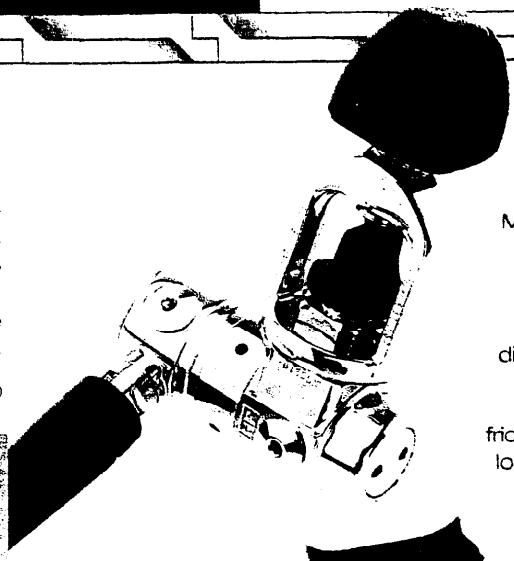
Arm yourself with the Sea Quest Octopus for high quality, reliability and easy-breathing. Whether you choose the Sea Quest Octopus or the Air Source™ breathable inflator, you'll have a dependable back-up system well within reach.

Black - 70135; Lime - 70130



Maximize your bottom line in superior regulator technology: breathability. Our engineers started with a dependable, balanced piston first stage. Then they added a large diameter, superflow hose via a built-in first-stage swivel and a feather-light second stage. Complete with a low friction, Teflon-tipped demand lever for low inhalation effort and an extra large exhaust diaphragm to decrease exhalation resistance. Breathe easy...unmatched performance is here. The Infinity.

INFINITY - 70110

Picture the Infinity in a sport model and you're looking at the Mirage. Superior breathing characteristics and proven piston performance make this regulator an excellent value for the sport diving enthusiast. Enjoy reliability, easy maintenance, precision and comprehensive service. Seek out the Mirage. Proven Sea Quest quality before your very eyes!

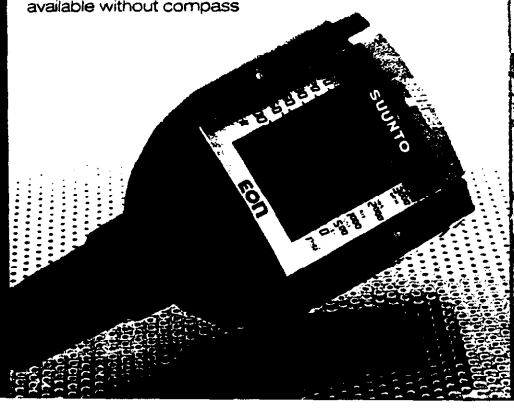
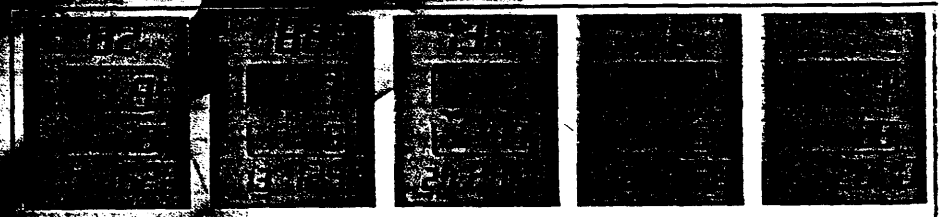
EON

The time has come for a new generation of Dive Computer. Eon is a revolutionary dive computer that accurately chronicles vital statistics of up to 25 hours of diving time. Available with or without compass, this air-integrated dive computer is the smallest and most compact of its kind. The phosphorescent LCD screen–excellent for night diving–displays valuable information from 45 functions. Eon also features an audible alarm system to warn you about low tank pressure, excessive ascent rate or depth and potential decompression situations. It even has a date and time clock. Eon comes equipped with a built-in dive simulator for use before and between dives to simulate the next dive's no decompression limits. The Eon dive time memory is divided into three different formats: logbook, profile, and history. And Eon can be interfaced with your personal computer to keep a detailed logbook of your dive profiles. It's been a long time coming, but perfection has definitely arrived. Eon–the ultimate in dive computer technology.

w/compass CB63 - EON
w/o compass CB62 - EON

available without compass





Dive Display - shows depth/max depth [illegible] and graph[illegible]

Decompression Dive Display - shows depth max depth digitally and graphically, ascent rate, ascent time, air pressure digitally and graphically and ceiling indicator

Surface Display - shows surface time, "do not fly" indicator (airplane), maximum depth and bottom time

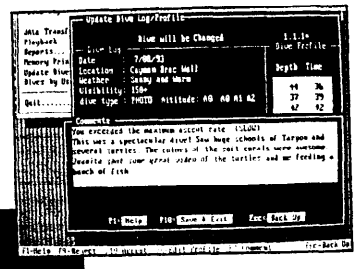
Log Display - shows: max. depth, bottom time, ending tank pressure, dive number and any warnings

Surface Interval Time - shows beginning tank pressure, temperature at max. depth. Alternating log screen will also show date and time of dive.

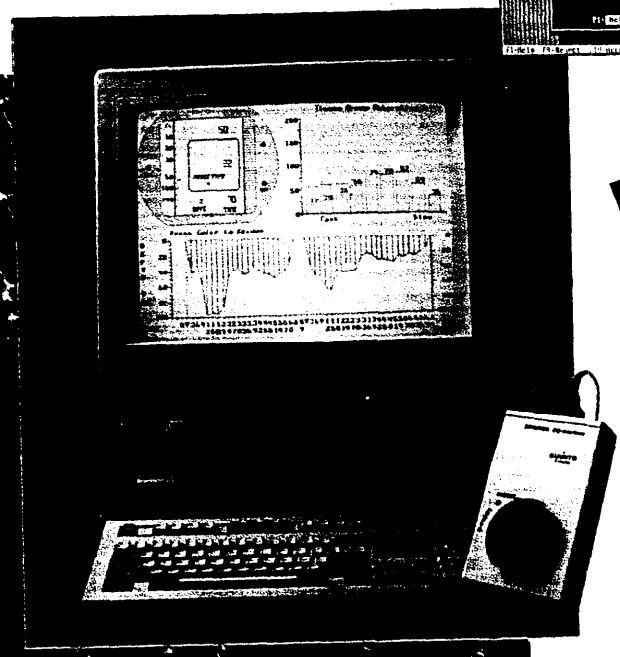
9.

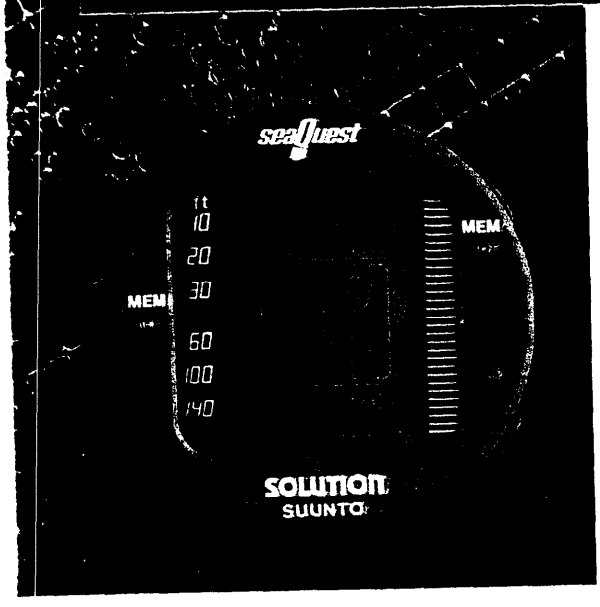
DIVE COMPUTERS

EON / SOLUTION



the EON and SOLUTION™ can be interfaced with a personal computer to keep a computerized log book and generate hard copy dive profile graphs.





SOLUTION

The engineers at Sea Quest and Suunto have joined together to design a dive computer that answers the needs of recreational divers. Powered by an 8-bit CMOS microprocessor, this smart dive computer utilizes a custom LCD screen to access 36 functions and 5 surface modes through pull-down menus. The Solution is equipped with a dive log, computer history, dive profile record, altitude adjustment, and built-in dive simulator.

Ascent time and ceiling information is provided for decompression. If the ascent rate is too fast there is a 3-step warning that tells you when to slow down. The Solution also includes an optional interface for your PC. The Solution is designed to be compatible with today's and tomorrow's generation of consoles. It's complemented by the most complete package of support programs and accessories in the world.

The Solution from Sea Quest.

A definitive response to today's sport diving demands.
