Dec 1, 1996

I Sandra K. Mullins was preparing to use the Anchor Hocking casserole dish. I reached in the cupboard took out the casserole, put the lid on the counter, left side of counter. Had the casserole in my left hand - was walking to the other side of counter. I was standing approximately one foot in front of counter and the casserole dish exploded in my hand. It sounded like a bomb blew up. It caused a puncture wound to my left hand, middle finger. The glass pit a hole in the tendon sheath. The puncture wound became infected. My hand became swollen, especially my middle finger. The middle finger became stiff and I could not move it at all. My Doctor sent me to a Hand surgeon. The Hand surgeon did surgery on my hand, opened it up and drained it. The doctors said it was really a big deal - as infection eats up tendons in the hand. I'm a Cosmetologist and own my Beauty Salon. I had to keep my hand immobilized and wasn't able to work. I went to the Hand doctor many times then I started therapy at the Hand clinic. I was released Nov 18, 1996. My finger still

I am back at work, I try not to do as many purses etc. as it does effect it. The therapist said, I should set a limit.

I recieved the Anchor Hocking casserole dish for Xmas last year and I had used it a few times.

My husband saved some of the Broken glass, hoping we could have it tested to see if it was defective. We have four pieces of glass mostly shattered with alot of lines thru them But this is a diagram (the best I can draw) of the four pieces. The rest of the pieces have no writing on them.
