NON-CPSC ATTENDEE(S): Contact SDO for the full attendee list.

Summary of Meeting:

The subcommittee meeting was led by the chair of the group, Bill Baxter. The meeting began with reviewing five comments on the recently closed ballot with included changes involving the addition of requirements for products that use batteries. The chair suggested some comments were persuasive and therefore those comments would be used to modify the proposed language and re-ballot the language. A member also suggested reviewing ASTM F963 for similar language to use as a template.

The next topic of business was notifying the group that Matt Kresse replaced Ben Mordecai as the new point of contact from CPSC and that CPSC provided recent incident data. The chair proposed that a task group should be formed to review that data and CPSC staff will participate in the task group.

Next Steps:

The volunteers for the data task group will meet when scheduled. The next subcommittee meeting is set to happen during the Spring 2027 Juvenile Products Subcommittee Meetings, currently scheduled for 4/26/2027 – 4/28/2027.
