(for deaf or hard of hearing individuals and/or individuals with speech and language disorders)

# Keep Your Kids *Safe* Learning Chemistry

- Ask the teacher what demonstrations will be performed with flammable liquids.
- Understand the hazards of experiments with fuel and flames.
- Ask how burn and chemical exposure dangers will be prevented:
  - Has your child's teacher received training?
  - Will appropriate personal protective equipment be used properly?
  - Will students observe the experiments from a safe distance?
