6 SOR 12/29/98 CS

COOPERATIVE AGREEMENT BETWEEN THE OREGON HEALTH DIVISION AND THE U.S. CONSUMER PRODUCT SAFETY COMMISSION

A. BACKGROUND INFORMATION

The mission of the U.S. Consumer Product Safety Commission (CPSC) is to provide an effective program to assure the safety of consumer products. The reporting of fatalities caused by or relating to consumer products to the Commission enables the Commission to assess the causes and magnitude of the injury problem for which it is responsible under the Consumer Product Safety Act, Public Law 92-573.

As part of its program, CPSC collects death certificates caused by or relating to consumer products from 52 health jurisdictions in the United States. The continuation of the receipt of death certificates will provide needed information for the ongoing study of the causes of death from consumer products and the ways to prevent such deaths. The collection of such data is essential to giving proper perspective to hazard analysis related to particular products and in giving trend data on product-related deaths.

As soon as the death certificates are received by CPSC's Division of Hazard and Injury Data Systems, they are screened for an identifiable product. Those with an identifiable consumer product are purged of victim identification information and sent to the CPSC National Injury Information Clearinghouse for use and storage. (Those certificates that do not mention an identifiable product are destroyed by CPSC.) Follow-up investigation of selected cases by CPSC may be conducted, but only in accordance with State Health Department criteria. Confidentiality of the identity of the accident victim is strictly observed at all times by CPSC and its representatives.

B. OBJECTIVE OF THE DEATH CERTIFICATE PROJECT

The objective of the Death Certificate Project is to provide the Commission with timely death certificates caused by or relating to consumer products from the 52 state health jurisdictions in the United States that relate to consumer products under the jurisdiction of CPSC. The collection of such data is essential to analysis of the hazards of particular products, and in evaluating trends on product-related deaths.

C. SPECIFICATIONS

In cooperation with the Government, the Contractor shall furnish all necessary personnel, materials, services, and facilities to conduct the work set forth below:

1. The Contractor shall permit the CPSC representative to collect and duplicate copies of all death certificates classified under specific external cause of death codes (E-Codes), as set forth in Attachment I, for deaths occurring in the Contractor's jurisdiction between October 1, 1998 through December 31, 1998. E-Codes are extracted from the "Ninth Revision, International Classification of Diseases" (see Attachment I). These copies of death certificates do not have to be certified. These codes have been selected because of the likelihood that consumer products of interest to the Commission may be involved.

2. As of January 1, 1999, the revised external cause of ICD-10 death codes (E-Codes), as set forth in Attachment II, will become effective. The Contractor shall collect and furnish copies of all death certificates as set forth in Attachment II, for deaths ocurring in the Contractor's jurisdiction between January 1, 1999 through September 30, 1999, in accordance with Article C.1. above.

3. The Contractor shall provide the CPSC representative with a copy of a computer printout, or other listing, of the death certificates containing the E-Codes of interest to CPSC to be retrieved and duplicated. The listing shall include, as a minimum, the E-Codes and death certificate number.

4. In furnishing this information on death certificates, the Commission will respect the confidentiality of the certificates and the information contained therein by purging the identity of victims prior to any use of the data.

5. The Contractor shall provide the CPSC representative access to a duplicating machine.

6. Accessing and duplication of specified death certificates will be conducted biannually by the CPSC representative at a pre-arranged time convenient to the Contractor.

D. PRIVACY ACT

This cooperative agreement does not require the Contractor to maintain a system of records as defined in the Privacy Act of 1974. More specifically, the Contractor is not required to, and agrees not to, maintain any system of records for or on behalf of the U.S. Consumer Product Safety Commission, in which any records or any personal data are indexed by, or retrieved by, a person's name, social security number, or any other unique identification.

E. PERIOD OF PERFORMANCE

Performance of work shall begin on October 1, 1998, and shall not extend beyond September 30, 1999. Modification of this Agreement shall be by mutual consent of the parties; however, if either party desires to terminate this Agreement, a written notice to the other party shall be forwarded and received thirty (30) days in advance of the desired termination date.
