**CONSUMER PRODUCT SAFETY
COMMISSION**

**Submission for OMB Review;
Comment Request—Safety Standard
for Omnidirectional Citizens Band
Base Station Antennas**

AGENCY: Consumer Product Safety
Commission.

ACTION: Notice.

SUMMARY: In the *Federal Register* of December 15, 1999 (64 FR 6992), the Consumer Product Safety Commission published a notice in accordance with provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) to announce the agency's intention to seek extension of approval of the collection of information required in the Safety Standard for Omnidirectional Citizens Band Base Station (16 CFR part 1204). No comments were received in response to that notice. By publication of this notice, the Commission announces that it has submitted to the Office of Management and Budget a request for extension of approval of that collection of information without change through April 30, 2003.

The Safety Standard for Omnidirectional Citizens Band Base Station Antennas establishes performance requirements for omnidirectional citizens band base station antennas to reduce unreasonable risks of death and injury which may result if an antenna contacts overhead power lines while being erected or removed from its site. Certification regulations implementing the standard require manufacturers, importers, and private labelers of antennas subject to the standard to test antennas for compliance with the standard, and to maintain records of that testing.

The records of testing and other information required by the certification regulations allow the Commission to determine that antennas subject to the standard comply with its requirements. This information would also enable the Commission to obtain corrective actions if omnidirectional citizens band base station antennas failed to comply with the standard in a manner which creates a substantial risk of injury to the public.
