Re: ANPR - Bunk beds

To Whom It May Concern:

I am writing in regard to the advanced notice of rule making pertaining to bunk beds. I truly feel there should be a mandatory standard in the design and construction of bunk beds.

If one child dies due to unsafe bunk bed design and manufacture this questions whether voluntary standards in the industry are: sufficient to protect our children. Due to the fact that there were more than 45 fatalities and over 100,000 injuries from 1990 to 1995, I feel that is overwhelming evidence that mandatory standards must be passed to ensure that this tragedy does not strike another American family.

Very Truly Yours,

Rande Zatt

COMMENT REGARDING ANPR ON BUNK BEDS

Commissioner,

I am writing in regard to the advanced notice of rule making pertaining to bunk beds. I truly feel that going forward with the mandatory standard in the design and construction of bunk beds is the only correct action to take.

If even one child's death is caused by nonconformance to the voluntary standard, that should be sufficient to tell us as an educated society that the voluntary nature of the standard is not good enough. There were in fact 54 deaths and over 100,000 injuries from 1990 to 1995. This is obviously overwhelming evidence that mandatory standards must be passed to save this nation's precious children.

Sincerely,

Barbara A. Mayernik

Re: ANPR • Bunk beds

To Whom It May Concern:

I am writing in regard to the advanced notice of rule making pertaining to bunk beds. I truly feel there should be a mandatory standard in the design and construction of bunk beds.

If one child dies due to unsafe bunk bed design and manufacture this questions whether voluntary standards in the industry are sufficient to protect our children. Due to the fact that there were more than 45 fatalities and over 100,000 injuries from 1990 to 1995, I feel that is overwhelming evidence that mandatory standards must be passed to ensure that this tragedy does not strike another American family.

Very Truly Yours,
