**Log of Meeting**

Subject: Evaluation of the Stingl Switch

Date of Meeting: April 18, 1996 Place: CPSC Headquarters  
Bethesda, MD

Log Entry Source: Roy W. Deppa, ESME

Date of Entry: May 22, 1996

Commission Attendees: Roy Deppa, ESME, Troy Whitfield, ESME

Non-Commission Attendees: David Stingl and Anthony Sirianni,  
David Alfred Stignl, Inc.

Summary of Meeting:

Mr. Deppa had requested the meeting to provide Mr. Stingl with a copy of the engineering assessment of the Stingl Switch. This device had been presented to CPSC by the National Spa and Pool Institute, for consideration as a method to prevent disembowelment and drowning. The meeting also presented an opportunity for CPSC staff to discuss the results of the assessment.

Mr. Stingl had been given a draft of the memorandum report prior to the meeting in order to complete 6(b)1 clearance of the document. Because Mr. Stingl was already familiar with the document, the meeting was brief.
