MEETING LOG

Date : September 8, 1997
Place : 200 Fifth Ave., New York, NY
Attendees : James Walter, Chairman (Mattel), Arthur Kazianis (Hasbro), Louis Mecseri (SONY Electronics), Jeff Lipko (ITS-Labtest Division), David Lipscomb, Ph.D. (Consulting Audiologist), Aaron Locker (Counsel to TMA), Elizabeth Borrelli (F15.22 Secretary)
CPSC Staff : Marilyn Wind, Ph.D.
Purpose : ASTM F15.22 Work Group on Acoustics Meeting
Submitted By : Marilyn Wind, Ph.D.

Available data on hazards of "noisy toys" was discussed. In addition existing toy safety standards on acoustics and other standards on acoustics were discussed. We discussed the kind of data that we would need such as data on how much time children play with specific toys. We would also like to know the rationale for some of the standards that currently exist such as the Canadian, Australian and European standards. It was agreed that David Lipscomb will put together a draft working paper and that we would meet again at the end of October.
