SUMMARY OF MEETING:

Background: ASTM WK70724 is a draft new voluntary standard for commercial electric-powered scooters (e-scooters) for adults. The task group was formed in January 2020 and CPSC staff are active participants of this task group. The task group divided into smaller working groups to develop the requirements of specific sections.

Summary: The meeting was conducted to work on editorial changes to the adult ride-share e-scooter standard. Staff confirmed there are plans to form a task group to develop requirements regarding safety messaging that appear through phone applications.

Next Steps: The task group chair and staff will continue to work on the draft to prepare for ballot. Staff will continue participating in sub and main task group meetings.
