"WRITE IT"

TO: Dr. Raleigh BLDG. 320-KP DATE: 1-21-75

SUBJECT: Bis (2-ethylhexyl) Terephthalate

*The above compound was tested recently under Acc. No. 907040 and HSL 74-170. According to the Basic Toxicity Report 75-4, 8/10 gps were sensitized --6 weak and 2 strong.*

*The sample being shipped today is from the first production run and is cleaner than the pilot-plant sample which was evaluated. We would be grateful if you could have a quick test run to determine if this cleaner material is also a sensitizer. Thanks.*

DEPT. TEC Lab. Ind. Med. SIGNED Margaret Bragg
