

Manufacturer: Van Blarcom Closures Inc.
Model: Saf-Cap Convertible
ASTM Type: IA

Description:

This is a two-piece plastic/plastic convertible continuously-threaded closure (Figure 1).

Figure 1

In the child-resistant mode, the top of the closure is even with the top of the closure skirt. In the child-resistant mode, the closure is opened by pushing down on the closure and simultaneously turning it counterclockwise (Figure 2).

Figure 2

The closure is converted into its non-child-resistant mode by pushing down on the top of the closure, which will descend and lock into place about 4-5 mm from the top of the closure skirt (see arrow in Figure 3). In the non-child-resistant mode, the closure is simply turned counterclockwise to open (Figure 3).

Figure 3

The manufacturer's instructions on the closure are (Figure 4):

(The instructions are continuously repeated across the top of the closure.)
To Open Push Down & Turn Close Tightly -
