MEETING SUMMARY

It has become necessary to develop a new funding mechanism to support the standard writing activities of the ANSI Z21/83 Committee. Mr. Grieco presented a draft plan where stakeholders in the individual standards would fund the activities to develop the standards they use. For example, the Gas Appliance Manufacturers Association (GAMA) would fund the furnace standards, which their members use, and the Association of Home Appliance Manufacturers (AHAM) would fund the gas-fired range standard for their members. Mr. Grieco also presented a draft plan to incorporate the Z21/83 Committee. Both proposals will be voted on at the April, 2002 Z21/83 Committee
