SUMMARY OF MEETING: ASTM meeting minutes from the June 22, 2004 meeting were reviewed, altered and approved. Three task groups will remain active; these task groups are data categorization, loading and feeding BBs in multi-shot air guns, age and velocity. The fourth task group, labeling and warnings will reconvene after recommendations have been provided by the other three task groups. Both the velocity/age and loading/feeding task groups expressed their dependence on the results of the data task group. The SC then divided into individual task groups.

The week of 16 February 2005 is the next scheduled SC meeting.
