

**U.S. Consumer Product Safety Commission
LOG OF MEETING**

SUBJECT: Meeting of ASTM Changing Table Collapse task group

DATE OF MEETING: 5/12/2016

LOG ENTRY SOURCE: Shaina Donahue

DATE OF LOG ENTRY: 05/17/2016

LOCATION: Telecon

CPSC ATTENDEE(S): Shaina Donahue

NON-CPSC ATTENDEE(S): Please contact ASTM for list of non-CPSC attendees

SUMMARY OF MEETING:

The teleconference was held to review proposed requirements to address changing table collapse incidents in preparation for sending out a ballot before the next ASTM subcommittee meeting (planned for June 2016).

The task group agreed upon the new definitions for "key structural elements" as well as "secondary support component." The group agreed upon the new requirement for threaded fasteners to not be used on key structural elements, but that they are ok for use on secondary support components as well as for use in attaching add-on units or contoured changing pads to other pieces of furniture.

The task group also agreed to go forward with the already-suggested proposal for consumer-installed support straps to NOT be used during structural integrity or barrier testing. (Slight editorial modifications to the wording of this proposal were made to address comments/suggestions coming out of the April 2016 ASTM subcommittee meetings.)
