SUMMARY OF MEETING:

The ASTM task group on changing table warnings discussed proposed revisions to the warning section of the voluntary standard, including the following topics:

- **Terminology:** Discussed adding new definitions for changing table accessory, changing product, and other changing products. The intent is to be able to use “changing product” throughout the standard, for sections of the standard that apply to all changing products to make the standard easier to read and understand. However, this also requires a full scrub of the standard to cross reference terminology.
- **Test methods:** A subtask group agreed to look at the test methods to make sure changes in terminology did not affect test methods.
- **Warnings, including ad hoc formatting language:** Ready for ballot, but will wait for terminology so that they go to ballot together, as the two are linked.
- **New standard to be published in July, which includes the retractable stair entrapment provisions.**

Next task group meeting will occur sometime in August.
