Summary of Meeting:

This task group is focused on developing a standard for wall beds. The former Chair was able to re-join the task group and resume their position as Chair. The focus of the meeting was to determine next steps in development of the performance requirements. To do so, the presentation given at the ASTM F15.42 Furniture Safety Subcommittee Meeting in April was reviewed. The following performance requirements still need to be developed:

- Mounting Hardware and Attachment
- Pinch Points
- Unintended Opening/Closing

It was decided to first focus on the unintended opening/closing requirements at the next task group meeting. To prepare for the next meeting, a poll was posted to allow task group members to comment on topics pertaining to unintended opening/closing and respective locking mechanisms.

Next Steps:

CPSC staff plans to attend the next meeting of the task group, which is scheduled for August 13, 2026.
