Summary of Meeting:

APA (American Pyrotechnics Association) Standards Committee and PHMSA (Pipeline and Hazardous Materials Safety Administration) met to discuss the comments to the proposed 2024 APA Standard 87-1A: Standard for the Construction, Classification, Approval and Transportation of Consumer Fireworks and Novelties. Most of the proposed edits were typos with some suggestions for adding examples or clarification. Lines 52 and 53 of the Roman Candles section will omit the term “handles” and at this time metal components will not be added to prohibited materials.

Next Steps:

APA will provide a finalized and approved version of the standard 87-1A.
