

## MEETING LOG

**SUBJECT: ASTM F589 Standard Consumer Safety Specification for Non-Powder Guns**

**OP PLAN ENTRY:** Hydrogel projectiles/non-powdered guns

**DATE OF MEETING:** 12/5/2025

**LOCATION OF MEETING:** Hybrid, CPSC Virtual

**CPSC STAFF FILING MEETING LOG:** Matthew J. Brookman (LSM)

**FILING DATE:** 12/5/2025

**CPSC ATTENDEE(S):** Matthew J. Brookman (LSM)

**NON-CPSC ATTENDEE(S):** Contact ASTM for the full attendee list.

### Summary of Meeting:

The ASTM F15.06 subcommittee convened to discuss various aspects of the ASTM F589 Consumer Safety Specification for Non-Powder Guns. Key topics included gun classifications, test requirements, warning statements, and incident data provided by the CPSC.

### Key Discussion Points:

- **Gun Classifications:**  
The subcommittee reviewed proposed changes to gun classifications from the previous meeting.
- **Test Requirements:**  
The subcommittee also evaluated test requirements for the newly proposed classifications. One member proposed exempting the hunting gun classification from the current drop test in ASTM F589. For products in this class, the drop test requirements from SAAMI would be incorporated.
- **Warning Statements:**  
Members discussed the necessary updates to warning statements to address changes in product classifications. One member will develop a proposal to be reviewed at the following meeting.
- **Incident Data:**  
CPSC responded to members questions regarding the 2024 CPSRMS and NEISS incident data provided to the subcommittee. Members reviewed the product types identified in the data.

### Next Steps:

- Members will develop a proposal for changes to warning requirements. This proposal will be discussed at the next meeting.
- The date for the next meeting is to be determined.
