LOG OF MEETING**

SUBJECT: Bassinet Stability task group – Low to the ground/Compact bassinets.

DATE OF MEETING: 3 Jan 2018

LOG ENTRY SOURCE: Hope E J. Nesteruk, ESMC

DATE OF LOG ENTRY: 10 Jan 2018

LOCATION: Teleconference from Rockville, MD

CPSC ATTENDEE(S): Hope Nesteruk, ESMC;

NON-CPSC ATTENDEE(S): Contact ASTM for attendance list.

SUMMARY OF MEETING:

The task group reviewed the latest draft of the proposal for compact bassinets, which is based on the EN standard for carry cots, and which had undergone some editorial changes since it was presented at the subcommittee meeting. There were some suggestions including clarifying that bassinet mode is when the product is *not* on a stroller, and that bassinets should be added to the list of products covered by the bassinet standard. The second suggest came up because the list of products covered by the standard is growing, and to avoid any misperceptions that bassinets were not listed, therefore not covered, bassinets should be listed.

The task group also discussed combining the proposal with the work the baby box task group is doing, but concluded that this work should not wait for the baby box work. In addition, the baby box work is dependent on the compact bassinet work, therefore, it would be better to get compact bassinets addressed and build on that.
