SUMMARY OF MEETING:

The Task Group (TG) on Clothes Washer Safety convened by teleconference. Three sets of IDIs have been distributed TG members prior to the meeting, and TG discussed observation from their review and asked for feedback from TG. CPSC staffs plan to share three more IDIs related with Front Loading washer when they are cleared and ready to be distributed. AHAM staff provided an updated on the AHAM TF activities. Currently, TF is focused on establishing uniform criteria for validity of the test and acceptability of test results.
