- The group continued to work on the working draft standard
- The group decided that the entire subcommittee would be polled on the flow out requirement options, therefore a sub-committee meeting will be scheduled once all other parts of the standard are ready for ballot.
- Other issues were addressed
- Two statements in the appendix will be reviewed off line
- A clean version of the document will be sent out for review soon
- The group anticipates that no other task group meetings will be needed
- The next (anticipated) meeting will be a sub-committee meeting TBD
