SUMMARY OF MEETING: This meeting was to understand the existing requirements for shearing, scissoring, and pinching and for hinge-line clearances in ASTM F2613 *Children's Chairs and Stools* standard. The task group came to a consensus on what the standard is requiring for testing. The task group will come up with recommendations for clarification of the test requirements so that test labs have a better understanding of the requirements and how to conduct the tests to ensure the requirements are met. Recommendations will be presented to the full subcommittee at the next ASTM meeting.
