**SUMMARY OF MEETING:**

The purpose of the meeting was to continue to discuss revising the warning label section as ASTM F406 to be consistent with the ad hoc recommendation for the warning sections of standards.

Since the last meeting, the task group lead had prepared a draft of the warning section, which the task group reviewed. There was much discussion and wordsmithing, but no full resolution on issues such as organization or specific wording.

The task group discussed section 9.5 up through the proposed 9.5.2.3

The task group chair will take the results of this meeting and revise the proposal. The proposal is not ready to be presented to the subcommittee at the May meeting, but will be briefly discussed as a work in progress.
