SUMMARY OF MEETING:

Code Making Panel 2, Taskgroup 2 met by teleconference and discussed public comments on the first draft for the 2020 edition of the *National Electrical Code (NEC)*, Articles 210, 215, and 220. The topics covered included branch-circuits, feeders, and branch-circuit, feeder, and service calculations. The main discussion topics of Taskgroup 2 are ground-fault circuit interrupters to mitigate electrocution and shock hazards, arc-fault circuit interrupters to mitigate electrical wiring and product fires, and load calculations for branch circuits. Taskgroups are formed to streamline the process and develop initial recommendations for public comments. The recommendations are presented to CMP 2 for panel debate and development of code text for the 2020 *NEC* at the second draft meetings held the week of October 22, 2018 in San Diego, California.
