SUMMARY OF MEETING:

CPSC staff attended the joint ASTM F15.53 and F15.55 subcommittees meeting for ASTM F2369, Standard Safety Specification for Non-integral Firearm Locking Devices, and ASTM F2456, Standard Specification for You-Resistant Firearms Containers (YRFCs), respectively. Revised 2019 versions of each of these standards is now available and includes editorial and terminology changes. The subcommittees discussed the current test procedures to enhance repeatability and relevance to potential attacks intended to defeat locks and containers within the scope of the two standards. The next meeting date is TBD.
