SUMMARY OF MEETING:

The purpose of the meeting was to review a proposal to incorporate the ad hoc warning format recommendation into the bassinet standard and also address compact bassinets warnings.

CPSC staff was unable to attend the most recent meeting of this task group due to the government shutdown. Some time was spent reviewing decisions made at a previous meeting to allow compact bassinets to place some warnings in a less conspicuous location, provided a conspicuous warning alerted consumers to the second location. The group decided to revisit the conspicuous warning issue once the warning messages for compact bassinets are available to review.

The task group reviewed and discussed the warning and labeling proposal presented.
