

U.S. Consumer Product Safety Commission Log of Meeting

SUBJECT: Meeting with Facebook Technologies on the Safety of Virtual Reality Systems

DATE OF MEETING: April 30, 2019

LOG ENTRY SOURCE: Patricia Adair, Office of Hazard Identification and Reduction

DATE OF LOG ENTRY: May 10, 2019

LOCATION: CPSC's National Product Testing and Evaluation Center (NPTEC), 5 Research Place, Rockville, MD

CPSC ATTENDEE(S) and NON-CPSC ATTENDEE(S): (see attached Meeting Attendance Record)

SUMMARY OF MEETING:

Facebook Technologies met with CPSC technical staff to discuss the safety of virtual reality systems. Facebook Technologies presented safety information on their Oculus Go and Oculus Quest gaming systems and CPSC staff were able to try these gaming devices. A new trade association called XRA has been formed to allow for industrywide collaboration on virtual reality for better user comfort and safety. At this time there are no industry safety standards for VR. Staff encouraged Facebook Technologies to work with the industry and standards developers on safety standards for this product category. Facebook Technologies provided staff with copies of the publication XR Primer 1.0: A Starter Guide for Developers.
