

**LOG OF MEETING
DIRECTORATE FOR ENGINEERING SCIENCES**

SUBJECT: Meeting of the ASTM Soft Infant Carriers Leg Openings (SITC) Flammability Task Group Meeting

DATE OF MEETING: 1 May 2019

PLACE OF MEETING: Virtual (teleconference)

LOG ENTRY SOURCE: Hope Nesteruk (ESMC)

COMMISSION ATTENDEES: Hope Nesteruk (ESMC) and Weiyang Tao (LSE)

NON-COMMISSION ATTENDEES: Contact ASTM for attendee list.

SUMMARY OF MEETING:

The task group discussed the flammability requirements in the SITC standard. There was considerable discussion about when to use the general wearing apparel test vs when to use the flammability of solids test. In addition, the task group discussed if every fabric used in the product should meet the general wearing apparel requirements. The group agreed to look at potential flame exposure, as there aren't sufficient incidents to draw conclusions.
