

**LOG OF MEETING
DIRECTORATE FOR ENGINEERING SCIENCES**

SUBJECT: Meeting of the ASTM Soft Infant Carriers Leg Openings (SITC) Task Group Meeting

DATE OF MEETING: 15 April 2019

PLACE OF MEETING: Virtual (teleconference)

LOG ENTRY SOURCE: Hope Nesteruk (ESMC)

COMMISSION ATTENDEES: Hope Nesteruk (ESMC) and Keysha Walker (EXC)

NON-COMMISSION ATTENDEES: Contact ASTM for attendee list.

SUMMARY OF MEETING:

The task group discussed the leg opening test, in particular, how to perform the test, and with which test probe, for back and hip carrying positions, which are typically used with older infants and toddlers. After discussion, the group decided to explore testing the carrier in all position and potentially using the toddler-size test probe used in the frame carrier standard.
