SUMMARY OF MEETING: This meeting was to discuss clarifications to the requirements for shearing, scissoring, and pinching and for hinge-line clearances in ASTM F2613 *Children's Chairs and Stools* standard. The task group chair presented a mark-up of the existing requirements including new figures that attempt to show how the requirements for clearances are to be assessed. The task group had several comments and the chair planned to further revise the propose changes and distribute to the task group for further review.
