SUMMARY OF MEETING:

At the previous subcommittee meeting, it was agreed to focus on developing a proposal to allow mattresses up to 2 inches in total thickness, provided there were no gaps between the mattresses and the play yard sides. The task group reviewed 8 potential proposals to achieve this goal. After discussions, the group reached consensus on several phrases developed from the 8 proposals.

Next step: The task group chair will take the selected phrases to develop a single proposal for task group discussion.
