

SUBJECT: ASTM F15.17 Subcommittee Meeting on Stationary Activity Centers

DATE OF MEETING: July 18, 2019

PLACE OF MEETING: Teleconference

LOG ENTRY SOURCE: Kevin Lee (ESMC)

COMMISSION ATTENDEES: Kevin Lee (ESMC), Celestine Kish (ESHF), Brian Baker (LSM)

NON-COMMISSION ATTENDEES: Contact ASTM for attendee list.

SUMMARY OF MEETING:

The task group discussed modification to section 5.11 *Spring Supported Stationary Activity Center*:

- redundant system to comply with 5.11.1 or 5.11.2
- 5.11.1
 - Redundant system shall be completely independent, and share no attachments to the primary suspension system.
 - Redundant system shall not experience loading during normal use.
- 5.11.2
 - Redundant system is webbing integrated into the spring assembly.
 - Needs to be tested to 7X with no fraying, treating or failures.
- 7.x
 - 120,000 cycles of dropping a 25 pound weight on seat of SAC.
 - Some members want section 7X to apply to all products
 - other members want section 7X to only apply to products with a redundant system integrated into the spring assembly

The next meeting will take place over teleconference on August 13, 2019.
