Summary of Meeting:

Contact ASTM for more details of this meeting.

This meeting was held to review the most recent candle incident reports and recalls reported in [saferproducts.gov](http://saferproducts.gov) and other sources.

The group reviewed two recalls posted to [saferproducts.gov](http://saferproducts.gov) on 11/19/2019 and 12/20/2019. The group reviewed six reports posted to [saferproducts.gov](http://saferproducts.gov) on 11/7/2019, 11/12/2019, 11/29/2019, 12/2/2019, 12/11/2019, and 11/17/2020. The group also reviewed one recall from Europe with a date of 12/18/2019. All issues identified in all the reports and recalls, except 11/29/2019 which was deemed to be out of scope, should be covered by the ASTM standards. Scott also summarized an IDI assigned from the 9/20/2019 incident the group originally discussed in October 2019. The group decided to add glass container coatings to the watch list for future review.

The next meeting was scheduled for April 21, 2020 at 10am ET.
