

US Consumer Product Safety Commission Log of Meeting

Subject: Joint UL/ULC TC on Flammable Liquid Containers

Date: November 17, 2020

Location: Teleconference

Prepared By: Scott Ayers (sayers@cpsc.gov, 301-987-2030) on November 17, 2020

CPSC Attendees: Scott Ayers

Non-CPSC Attendees: Contact UL for more a complete list of attendees.

Summary of Meeting:

Contact UL for more information about this meeting

This a meeting of UL STP 30, which is a new draft UL 30 joint standard that incorporates requirements from UL 30, UL 1313, and ULC ORD-30, which all cover flammable liquid containers. The new draft UL 30 joint standard also includes a test method for flame mitigation devices.

The STP formed several task groups in the spring to develop different parts of the new draft UL 30 joint standard; the work from each task group was collated into a final draft which was sent out for preliminary review to the STP. This meeting was called to review comments received from the preliminary review.

The meeting began with a presentation from a manufacturer of expanded metal mesh flame and explosion mitigation devices. The manufacturer would like the new draft UL 30 joint standard to include provisions that allow this technology as an option. The manufacturer will provide a proposal for the STP to review in advance of the next STP meeting.

The STP began reviewing comments to the scope, terminology, and general requirements. The STP will continue to review comments at the next meeting.

The next meeting will be on Monday December 7, 2020 from 10am to 12pm ET.
