

**LOG OF MEETING
DIRECTORATE FOR ENGINEERING SCIENCES**

SUBJECT: Meeting of the ASTM F15.22 Safety Requirements for Tricycles

DATE OF MEETING: May 14, 2020

PLACE OF MEETING: Virtual (teleconference)

LOG ENTRY SOURCE: Jill Hurley (ESHF)

COMMISSION ATTENDEES: Jill Hurley (ESHF), Kristen Talcott (ESHF) Susan Bathalon (EXHR)

NON-COMMISSION ATTENDEES: Contact ASTM for a full list.

SUMMARY OF MEETING:

The ASTM meeting of F15.22 Tricycles was led by Al Kaufmann and Joan Lawrence of the Toy Association (TA). The focus of the meeting was the transfer of the Tricycle Standard, currently under ANSI Z315.1, to a new ASTM standard. The intent of the meeting was to review initial redline edits made to the current 2011 revision of ANSI Z315.1 standard and create a workgroup to continue revisions of the new standard. Proposed edits included but are not limited to formatting the standard to ASTM requirements, updating the scope, and additions to the terminology and performance requirements. During the meeting, several areas within the standard were introduced with the idea that the workgroup would continue the review. In addition, members discussed several approaches with various redline sections of the standard, and members were invited to continue review in preparation for the next ASTM tricycle working group meeting.

The meeting concluded with established workgroup members, of which includes CPSC staff, and a call for Chair nominations. The next meeting will be held in August 1, 2020.
