SUMMARY OF MEETING:

The agenda included administrative changes, CPSC data, working draft standard, and future meetings.

The ASTM F15.58 WK70724 task group made members aware of the CPSC incident data and current SAE work on micromobility. A majority of the meeting revolved around the scope of the standard and whether the purpose of the standard was to cover ride-share scooters or both ride-share scooters and personal consumers e-scooters. Staff requested improving the conspicuous definition and to consider adding electronic safety information. A member requested the task group to consider the risk of hacking as it relates to rider safety.

Moving forward, the task group intends to schedule monthly meetings.
