PRODUCT: Trampoline Courts

SUBJECT: ASTM F24.61 Trampoline Courts Meeting

LOCATION: Teleconference

DATE: April 29, 2021

ENTRY DATE: April 30, 2021

LOG ENTRY SOURCE: Daniel Taxier (ESMC)

COMMISSION ATTENDEES: Daniel Taxier (ESMC)

NON-COMMISSION ATTENDEES: Contact ASTM for listing of all attendees

MEETING SUMMARY:

This task group actively updates the voluntary standard for trampoline courts. The current version is ASTM F2970 – 20 *Standard Practice for Design, Manufacture, Installation, Operation, Maintenance, Inspection and Major Modification of Trampoline Courts*.

The task group discussed a proposal to add a requirement that manufacturer's specify minimum and maximum pressures in airbags, and specify minimum blower operation and maintenance requirements. These operation and maintenance specifications are not consistently listed in operation manuals provided by manufacturers today. Airbags are used in trampoline courts and other amusement areas to prevent injuries to consumers caused by impact with the ground. CPSC staff did not provide specific feedback during the meeting. The proposed language will be distributed to the task group members for further discussion at the next meeting.

The next Trampoline Courts task group meeting is expected to take place in May.
