

**LOG OF MEETING
OFFICE OF HAZARD ANALYSIS AND REDUCTION**

SUBJECT: ASTM F15.16 High Chairs

DATE OF MEETING: 3 May 2021

PLACE OF MEETING: Virtual (teleconference)

LOG ENTRY SOURCE: Stefanie Marques (HSPP)

COMMISSION ATTENDEES: Stefanie Marques (HSPP), Hope Nesteruk (ESMC), Keysha Walker, Carlos Torres, Maureen Danskin

NON-COMMISSION ATTENDEES: Contact ASTM for attendee list.

Meeting Summary:

Ballot results: None

Task group reports:

Test weight placement Task group- Discussed proposed ballot to clarify the placement of test weights for the test labs (section 7.7 F404-20). The TG discussed that shifting weights more forward due to angled seat backs could affect stability testing in the forward and rearward direction. The TG discussed the use of a shot bag as a test weight but is not proposing this currently and but will continue to discuss it.

Restraint system identifier and revised figure Task group- Has not met and needs a new chair.

Old business:

Passive Crotch restraint section 6.9- Discussed that the requirement is not an issue just how it is described and will look into clarifying the section in the future.

Next steps: The Subcommittee chair will send out to ballot a clarification of section 7.7.
