

## CPSC STAFF MEETING LOG

**Meeting Dates:** 05/10/2021, 05/11/2021, & 05/13/2021

**Location:** Teleconference

**Subject:** UL STP 3300 - Service Communication Information Education and Entertainment (SCIEE) Robots - Task Group 1 (TG1)

**Product:** Artificial Intelligence

**Prepared By:** Vineed Dayal

**Date of Log:** 05/13/2021

**Attendees:** Contact UL for a complete list of attendees.

**CPSC Attendees:** Vineed Dayal & Zachary Goldstein

### **Meeting Summary:**

Contact UL for more details of this meeting.

These three meetings were the first in a series of TG1 meetings to address the STP's comments and concerns with the scope of the potential new voluntary safety standard for SCIEE robots.

The task group started by generally discussing each member's concerns and goals for the standard. Staff expressed a need to focus on the interactions between consumers and SCIEE robots that are not covered in other standards or that may need to be further developed within the proposed standard.

Next, the task group discussed potential overlaps between UL 3300, 3100 and other standards. Staff and other task group members suggested requesting a clarification from the UL STP 3100 on their use of the word "commercial" and the lack of the use of "robot" in the standard. TG1 will reconsider the use of those words in UL 3300 or defining them within the standard, based on the STP 3100's feedback.

The task group also reviewed the STP's comments on the scope and their list of potential types of robots that may or may not be covered by the standard. Staff provided expertise on jurisdictional overlaps, such as industrial/consumer, education/toy robots, etc., throughout the conversations.

TG1 did not complete their review of the scope or the list of robots. The PM plans to assign action items to the group and schedule at least two additional meetings during the week of May 24<sup>th</sup>, 2021.
