Summary of Meeting:

Contact ASTM for more details of this meeting.

This meeting was held to review the most recent candle incident reports and recalls reported in [saferproducts.gov](http://saferproducts.gov) and other sources.

There were no new recalls posted to [SaferProducts.gov](http://SaferProducts.gov).

The group reviewed 3 incidents posted to [SaferProducts.gov](http://SaferProducts.gov) dated 9/24/2021, 10/8/2021, and 10/12/2021. The group believed all of the issues identified within the reports should be covered by the ASTM standards. Yeon Kim confirmed with the group that the 10/8/2021 was assigned an IDI by CPSC; staff will review the IDI and possibly ask for a redacted copy to share with the group.

The group also reviewed a recall from Australia. The recall included limited details on the failure mode of the candle.

The group was not aware of any other recent incidents or recalls from other sources, such as Health Canada.

The next candle incident quarterly meeting is scheduled for January 25, 2021 at 9am ET, followed by a candle fire safety task group meeting.
