

## **U.S. Consumer Product Safety Commission Log of Meeting**

**SUBJECT:** Teleconference/Web meeting with the ASTM F2057 Clothing Storage Unit Scope Task Group

**DATE OF MEETING:** January 19, 2022

**LOCATION:** Teleconference

**LOG ENTRY SOURCE:** Kristen Talcott

**DATE OF LOG ENTRY:** January 19, 2022

**CPSC ATTENDEES:** Kristen Talcott, Daniel Taxier

**NON-CPSC ATTENDEES:** Contact ASTM for the full list of attendees

### **SUMMARY OF MEETING:**

The purpose of the meeting was to discuss proposed revisions to the scope of the ASTM F2057 Clothing Storage Unit voluntary standard. Draft language was previously balloted and received negatives and comments. Task group members reviewed new draft language, which the task group chair sent to members prior to the meeting. Discussion included adjustment of levelers to measure the height of a unit, the use of the term “extension element” instead of drawer, proposed figures, how to calculate volume for storage behind doors, clear front drawers, specific wording and grammar, and which text should go in a footnote as opposed to the body of the document. The task group is considering whether to ballot the scope revisions once the task group agrees on the new draft language, or hold the ballot until other ballots for the standard are ready.
