

LOG OF MEETING
DIRECTORATE FOR ENGINEERING SCIENCES

SUBJECT: ASTM F15.18 Baby Changing Products Task Group Meeting

DATE OF MEETINGS: February 24, 2022

LOCATION: Teleconference

LOG ENTRY SOURCE: Lawrence Mella

COMMISSION ATTENDEE(S): Lawrence Mella, Suad Wanna-Nakamura, Jacqueline Campbell

NON-COMMISSION ATTENDEES: Contact ASTM for attendee list

SUMMARY OF MEETING:

Background: ASTM F15.18 is the subcommittee on cribs, toddler beds, play yards, bassinets, cradles and baby changing products. The subcommittee has jurisdiction of ASTM F2388 – 21, *Standard Consumer Safety Specification for Baby Changing Products for Domestic Use*. On June 26, 2018, the Commission published a final rule that incorporated by reference ASTM F2388 – 18, *Standard Consumer Safety Specification for Baby Changing Products for Domestic Use* under section 104 of the CPSIA.

Summary: The task group discussed new types of baby changing products. The task group discussed classifications of the new products that may fall into the contoured changing pad and add-on changing unit categories. Some of these products have a flat surface, compared to the traditional U-shape. Contoured changing pads only have requirements for barriers on two sides instead of on all four sides. The task group discussed clarifying definitions of changing pads and contoured changing pads and asked CPSC if they were aware of incident data regarding contoured changing pads. CPSC staff agreed to research incident data regarding contoured changing pads.

Next Steps: The task group intends to schedule an additional meeting before ASTM's committee meetings. CPSC staff will provide the task group with any available data on contoured changing pads.
