

**LOG OF MEETING
DIRECTORATE FOR ENGINEERING SCIENCES**

SUBJECT: Meeting of the F15.18 Bassinet – Sleeping Pad and Latch Task Group

DATE OF MEETING: May 19, 2022

PLACE OF MEETING: Virtual (WebEx)

LOG ENTRY SOURCE: Celestine Kish (ESHF)

COMMISSION ATTENDEES: Celestine Kish, ESHF, Carlos Torres, ESMC, Fred DeGrano, ESMC

NON-COMMISSION ATTENDEES: David Campbell, Task Group Lead, Contact ASTM for full attendee list.

SUMMARY OF MEETING:

Mr. Campbell provided background information about a company's product that is a combination bassinet and play yard. This product has a unique design that has a removable mattress and cushioning under the "floor" of the product. There is another task group in the Play Yard subcommittee also considering changes to that standard to clarify "mattress" and "floor" to accommodate this product's design. Mr. Campbell explained the suggested changes to the definition of "mattress" and "floor." CPSC staff asked for more clarification to a term used in the floor definition and the task group members agreed to clarify in the "mattress" definition. Mr. Campbell explained clarifying "mattress" throughout the standard. CPSC staff raised a question about padding on top of the "floor" which led to a productive discussion about the "vertical gap" requirement which limits the thickness of the foam layer to 1.5".

Mr. Campbell will give an update on the task group's progress during the subcommittee meeting (5/24/22). Then he will share the suggested changes with the subcommittee for comments. After all comments are addressed and recommendations are in agreement with the changes for the play yard standard, he will put into ballot. The meeting adjourned at 2:50pm.
