SUMMARY OF MEETING:

Mr. Campbell called the meeting to order. After introductions and the meeting agenda was approved, discussion on new business related to connected products began. Mr. Campbell invited the member who requested the new business to explain the topic. He explained there is a generic standard for connected (electronic/app) products that looks at security and safety, but juvenile products subcommittees might want to consider more specific issues related to products. Members have concerns with creating requirements for products that have not been developed yet. The subcommittee decided to start a task group to start looking at the issue. Ms. Kish and Dr. Wanna-Nakamura volunteered to be on the task group.

The meeting adjourned at 10:20 am.
