**Date of meeting log:** August 3, 2022

### Meeting Summary:

The ANSI/PHTA-5 Standard Writing Committee (SWC) for residential in-ground swimming pools is meeting to review and revise the safety standard. In March 2022, the committee had an active ballot to reaffirm ANSI/ICC/PHTA-5 to keep the standard active and prevent it from being withdrawn, per ANSI guidelines. This committee ballot closed without public comments. New standard revision discussions began in March 2022 and are ongoing. The revisions currently being discussed are considered a five-year standard revision process with publication of the next revision in 2027 or earlier. In the process, a new committee, the PHTA Technical Advisory Council (TAC) to review the SWC revisions to the standard.

The Anti-Trust policy was reviewed. The July 20, 2022 meeting minutes were reviewed and approved. The SWC continued review of the standard starting at Section 5.2. The SWC reviewed sections in order and approved the language in the current published standard from Section 5.2 to 6.2. review proposed changes. Proposed changes in included Section 5.4 removal of walking and simply using the term ledge, and section 5.9 designed for and constructed on site language was added.

### Next Steps:

The SWC members will review the proposed revisions and discuss those revision in the next meeting and begin in Section 6.3. The next meeting will be on August 17, 2022, at 10 am EST.
