MEETING SUMMARY:

The APA Standards Committee met to discuss possible revisions to 2018 APA Standard 87-1A: Standard for the Construction, Classification, Approval, and Transportation of Consumer Fireworks. Committee members discussed grammatical revisions to provide clarification to the standard and to potentially omit Appendix I: Permitted and Restricted Chemicals. The committee would like to make the appendix a stand-alone document that would also be incorporated by reference by the Department of Transportation.

Next Steps:

CPSC staff plans to attend the Standards Committee Meeting at APA Winter Educational Conference in February 2023.
