

MEETING LOG

MEETING TITLE/SUBJECT: Energy Storage System Ad Hoc Committee Meeting

OP PLAN ENTRY: Building Codes

DATE OF MEETING: 1/25/2024

LOCATION OF MEETING: Virtual

CPSC STAFF FILING MEETING LOG: Scott Ayers, 1/26/2024

CPSC STAFF ATTENDEE(S): Scott Ayers (ESEF)

NON-CPSC ATTENDEE(S): Contact ICC for a complete list of attendees.

Summary of Meeting:

The International Code Committee (ICC) formed an ad-hoc committee to review code requirements for energy storage systems, including lithium-ion and non-lithium-ion batteries. This ad-hoc committee may review, consider, and propose requirements that effect residential construction and possibly consumer products. This was the kick-off meeting of the group. CPSC staff was not able to attend the full meeting.

ICC staff provided context and background on the group. The group will work to develop proposals as needed to various ICC code panels. Participants provided feedback on various aspects that may impact the group.

The ICC proposed four working groups for members to participate on. CPSC staff volunteered to participate in two groups, one looking at micro-mobility and electric vehicles and the second focused on residential energy storage systems (ESS).

Next Steps:

The ICC will send out a poll to determine the next meeting date. Staff will participate, as able, on the micro-mobility and residential ESS work groups as able.
