Summary of Meeting:

The task group discussed restricted speed requirements for electric balance bikes. CPSC staff expressed to the task group that the maximum speed limits should be reasonable for the child's capabilities and that a strong rationale would be needed when determining the maximum speed limits. The task group discussed requiring a level of difficulty to changing the speed limit such that children are unlikely to be able to change the mode.

Next Steps:

CPSC staff will participate in the next task group meeting to continue the development of the draft standard.
