

## **MEETING LOG**

**SUBJECT:** ASTM F08.10 Subcommittee on Bicycles

**FY 24 OP PLAN ENTRY:** Bicycles

**DATE OF MEETING:** 2/7/2024

**LOCATION OF MEETING:** Virtual

**CPSC STAFF FILING MEETING LOG:** Lawrence Mella (ESMC)

**FILING DATE:** 3/7/2024

**CPSC ATTENDEE(S):** Lawrence Mella (ESMC)

**NON-CPSC ATTENDEE(S):** Contact ASTM for the full attendee list.

### **Summary of Meeting:**

The subcommittee discussed a negative on the ballot for the bicycle grip standard revision. The commenter explained to the subcommittee that the hardness of the end caps should be 65 shore D instead of 65 shore A. Subcommittee members and staff agreed that the requirement should be 65 shore D, which has a greater hardness than 65 shore A. Additionally, the commenter discussed handlebars with significant inside and outside chamfers that allowed end plugs to be pushed into the end of the handlebar and requested that OEM handlebars instead of the handlebar coupons be used when testing. The subcommittee will withdraw the draft standard revision, correct the shore hardness requirement, and re-ballot the revision to the bicycle grip standard.

### **Next Steps:**

CPSC staff will participate in the next subcommittee meeting to continue the development of bicycle standards.
